

Alabama RC&D Council Grants

“RC&D” is short for Resource Conservation and Development, a unique process that helps people protect and develop their economic, natural, and social resources in ways that improve their area's economy, environment, and quality of life.

There are 9 RC&D Councils across Alabama, and many provide funding for conservation education projects such as Outdoor Classroom development at area schools. The grant amounts vary widely from \$250 to \$2,500 or more.

Contact the area in which your school resides and see if they are currently accepting grant requests for the coming year.
